

Grass Growing, Outdoor Loving, Hard Working, Lawn Care Experts!

Today's Treatment: Late Spring Lawn App. & Turf Builder/Mow Reducer

What We Applied Today: Today we applied a micro nutrient fertilizer, a 'booster' pre-emergent to help prevent grassy weeds, we treated for any broadleaf weeds and we applied a turf builder and mow reducer to your lawn.

What Today's Treatment Does: This app. will feed your lawn and provide a dark green color. The pre-emergent will help control grassy weeds such as crabgrass & foxtail. We treated for broadleaf weeds like dandelion & clover. Plus, the Turf Builder/Mow Reducer will thicken your lawns roots while slowing down growth for 4-6 weeks.

What You Should Do For Best Results: If it does not rain within 10 days, please try to water your lawn. Mow anytime after today. Mow as high as possible(3.5"-4") for the rest of the season and make sure your mower blades are sharp.

Call us anytime with any questions!

TWO APPS. ARE BETTER THAN ONE!

Today we applied two applications. We applied our favorite new application, the Turf Builder/Mow Reducer, and your Late Spring App. It is necessary to apply these two applications together because of timing. It is important to get your second pre-emergent down before June 1st to prevent grassy weeds like crabgrass and foxtail. It is also the proper time to apply the Turf Builder/Mow Reducer to get the most benefits from this great NEW application!

We absolutely love the benefits of the NEW Turf Builder/Mow Reducer app. Obviously the main benefit is less mowing and fewer clippings for 4-6 weeks. However, the secondary advantages are awesome too! Stronger roots, darker green color, better heat & drought tolerance, and fewer diseases are all additional paybacks!

Spend less time mowing your lawn and more time enjoying it!

Please call us anytime if you have any questions about today's service! If you need to, you can pay us for one app. now and one in 30 days!

Thank You for Your Continued Business!

TODAY'S APP. WILL MAKE ME STRONG AND SUPER DARK GREEN! PLUS, IT WILL MAKE MOWING ME EASIER!

FEZ SAYS, "DON'T GIVE ME A BAD HAIRCUT! MAKE SURE YOUR MOWER BLADES IS SHARP! DULL BLADES RIPS MY LEAF TISSUE TURNING THEM BROWN. PLUS, IT CAN LEAD TO DISEASE."

A LAWN MOWING REDUCER TREATMENT?

It sounds too good to be true, but it is not!

FEZ Q. GRASS

ClassicLawns can reduce the amount of mowing you have to do. Not only does our NEW Turf Builder/Mow Reducer cut down on your mowing, it actually makes your grass greener and healthier!

Spend Less Time Behind Your Mower

ClassicLawns' NEW Turf Builder/Mow Reducer is a plant growth regulator. It redirects the grass' energy from the shoots to the roots! Basically, it promotes root growth and not top growth. This not only saves you time, but also benefits the health of your turf! Once applied the mowing reducer **DOES NOT** have to be watered in and is rain-fast within 30 minutes!

How Long Does it Last?

It lasts about 4-6 weeks and will reduce your mowing from once every 3-5 days to once every 7-10 days. Plus, it greatly reduces the amount of clippings!

Darker Green Grass & Other Benefits

The NEW Turf Builder/Mow Reducer promotes root growth, so your lawn gets stronger roots. Stronger roots means better heat and drought tolerance. Plus, stronger roots means your lawn is less susceptible to disease. An even better benefit is all that redirected energy gives you a darker green lawn. So, our NEW Turf Builder/Mow Reducer Treatment gives you:

- Darker Green Grass
- Stronger Roots
- Better Heat & Drought Tolerance
- Less Clippings & Less Bagging
- Less Chance For Diseases
- More Time For You!

Call us with any
questions!

DANDELIONS & OTHER BROADLEAF WEEDS

Just a reminder that the pre-emergent applied today does an excellent job of preventing grassy weeds like crabgrass. However, preemergents do **NOT** control dandelions, clover, and other broadleaf weeds.

The best preventative control of broadleaf weeds is to keep your lawn thick and healthy so that broadleaf weeds struggle to compete. **ClassicLawns'** fertilizer program is designed to do just that. **Plus, we treat for broadleaf weeds with every app.**

Remember, service calls are always FREE if weeds pop up!

GOT MOLES?

QUIT BLAMING GRUBS!

GRUBZILLA

If I had a dollar for every time I was asked if I could kill moles, I'd be hanging out with Warren Buffet and Bill Gates. Then undoubtedly the next question I am asked is, "What can you do to get rid of the grubs so the moles will go away?"

I'm not sure how moles and grubs became so closely linked together, but it needs to stop. While it is true that moles eat grubs, grubs are not there main food source. We could take all the grubs away from moles, but it would be like taking pizza away from us. We are still going to eat chicken and hamburgers.

The moles main food source is earthworms. In fact, they are up to 85% of the moles diet. Earthworms are not insects so we can't kill them by applying insecticides to your lawn nor do we want. Earthworms are very beneficial to the soil.

So if controlling grubs doesn't get rid of moles and applying insecticides doesn't get rid of moles, then what are we do to do about these annoying lawn destroying moles? Unfortunately, the only answer is the good old fashion mole traps. By traps we mean mechanical mole killing devices. Although trapping is challenging, it is the most successful and practical method to get rid of moles and eliminate damage.

Don't waste your money on baits, repellents, noise makers, chewing gum, or fumigants. Don't waste your time trying to drown them with your garden hose. It rarely works. Just go buy some good traps and learn how to trap them.

Learn how to trap them and get more info by visiting my website: <http://getagreenerlawn.com/carys-corner-got-moles-quit-blaming-grubs/>
